PROJECTS

Ecommerce Website ([Link](#))

Technologies used: Java, Spring Core (IOC, Dependency Injection, Bean Management), MySQL

- This project is a simplified **e-commerce platform** developed using **Spring Core** framework. The application allows users to manage their items seamlessly with functionalities to **add, update, delete, and view items**. All data is persistently stored in a **MySQL database**, ensuring reliability and scalability.

Amazon Healthcare Clone ([Link](#))

Technologies used: HTML, CSS, Bootstrap

- Designed and developed a static website using HTML, CSS and Bootstrap
- Users can login and book their appointments with doctors for health check-ups.
